ATTN: MR. BEN PHILIPSON

Dear Mr. Philipson,

I have used your CURATRON Clinical model for over a year now and the results for my patient's has been nothing short of amazing. Patients with chronic pain from fibromyalgia, arthritis, etc.. have had tremendous reductions in pain with increases in their ROM. Also, fatigue from various chronic conditions have also responded with very satisfactory results. However, the most amazing results have been with osteoporotic patients. In most cases, bone mass is significantly increased in 3-6 months. This being truly phenomenal because treatments for osteoporosis usually takes in excess of 12 months to see any change in bone mass. I can say with confidence that the Curatron technology has helped my patients and I would highly recommend this to anyone who is suffering.

Sincerely,

James C. Corzine, D. C., Dipl.ac(FIAMA)
